Profile

Results-driven Software Engineer with 2.5+ years of experience in full-cycle Product Development, Front-End Development, specializing in building cross-platform applications using React Native and TypeScript, with a strong ability to translate UI/UX concepts into clean, responsive code that drive real business impact.

Skills & Technologies

Frontend Development: React Native, JavaScript, TypeScript, HTML, SCSS, Redux, REST API Integration, WebSockets, Third-party Library Integration

Backend and DB: Node.js (basic), Firebase, Firestore (NoSQL), Oracle (basic), SQL

UI/UX, Tools & IT Support: Figma, End-User Support, Postman, Office 365, Visual Studio Code, Git & GitHub (Version Control), Windows (XP to 11), MacOS, Troubleshooting, MS Word & PowerPoint

Project & Agile Management: Scrum, Jira, Confluence, Sprint Planning, Backlog Management, QA Coordination, Microsoft Office (Excel, Word, PowerPoint), Documentation.

Soft Skills: Client Communication, Collaboration, Agile Mindset, Problem Solving, Analytical Thinking, Time Management, Team Work

Cybersecurity Awareness: Basic understanding of secure development and data protection

Cloud & Platforms: Familiarity with AWS & Azure ecosystems (entry-level)

AI Integration: Using APIs like OpenAI, Gemini APIs from Google AI Studio, tool usability like Cursor, Gemini CLI, etc.

Professional Experience

Former Co-Founder, FytLY (Startup - Closed) 

06/2025 – 05/2026
Nuremberg, Germany

- **Led Full-Cycle Product Development** for a cross-platform fitness ecosystem, architecting a scalable mobile application with **61 screens** and **50+ REST API integrations**.
- **Engineered core modules** using **React Native and TypeScript**, implementing a robust state management system with **Redux Toolkit** to handle real-time workout execution and complex habit analytics.
- **Implemented AI-powered workout generation** using **Prompt Engineering** and SocketIO streaming, reducing perceived load times by **60%** through progressive loading and live updates.
- **Integrated native health data** via **HealthKit (iOS)** and **Health Connect (Android)**, automating background data synchronization for step counts and activity tracking.
- **Optimized application performance** by implementing intelligent caching strategies, reducing API calls by **40–60%** and improving screen load times by **30–50%**.
- **Translated UI/UX concepts** into pixel-perfect, responsive code using **React Native Reanimated**, achieving a high-performance frontend.

React Native Developer, Innow8apps

07/2022 – 10/2023
Mohali, India

- **Architected and maintained cross-platform mobile applications** using **React Native, Redux, and Firebase**, delivering high-performance solutions for international clients.
- **Translated UI/UX concepts into clean, responsive code**, ensuring seamless performance and visual consistency across iOS and Android platforms.
- **Optimized application performance** by conducting rigorous **debugging and root cause analysis**, resulting in improved app stability and code quality.
- **Collaborated in an Agile/Scrum environment**, actively participating in **sprint reviews and daily standups** to incorporate client feedback and streamline feature delivery.
- **Integrated REST APIs** and third-party libraries to extend app functionality while managing **Git-based version control** within remote, cross-functional teams.
- **Produced technical documentation** for handover-ready features and managed **production-ready builds**, ensuring full functionality through cross-platform testing.

React Native Intern, *Innow8apps*

11/2021 – 06/2022

Mohali, India

- **Developed pixel-perfect user interfaces** using **React Native**, ensuring a smooth and responsive end-user experience across multiple device types.
- **Contributed to a full-cycle mobile project**, collaborating closely with **UI/UX designers, backend developers, and QA engineers** to align technical implementation with business requirements.
- **Streamlined application deployment** and performance by actively participating in **debugging and code optimization** phases.
- **Integrated third-party libraries and REST APIs** to enhance feature sets, following industry-standard **Git-based version control** practices.

React Developer - Apprenticeship, *Solitaire Infosys Inc*

08/2021 – 10/2021

Mohali, India

- **Engineered a Single-Page Application (SPA)** using **React, JavaScript (ES6+), HTML5, and CSS3**, focusing on modular component architecture and responsive design.
- **Implemented dynamic image search functionality** by integrating an **external REST API**, managing asynchronous data fetching and state updates to provide real-time results.
- **Optimized frontend performance** and user experience through efficient **DOM manipulation** and clean code practices.

Education

Friedrich-Alexander University,

Master of International Information systems (Wirtschaftsinformatik)

10/2024 – Present

Erlangen-Nuremberg,
Germany

Punjab Technical University, *Master of Computer Applications*

2020 – 2022

Mohali, India

Punjab Technical University, *Bachelor of Computer Applications*

2017 – 2020

Mohali, India

Projects

1. TaskOrbit (AMOS SS 2026) | React, TypeScript, LiveKit, FastAPI, GCP Open-source conversational / voice AI agent platform built in an international Scrum team at FAU (Prof. Riehle). Contributed to the React + TypeScript frontend (agent config UX, Legal Notices UI), SBOM / open-source compliance (Syft, license notices, GitHub Actions CI), and Grafana/Loki benchmarking for STT/TTS performance. Deployed on GCP.

04/2026 – 07/2026

Nürnberg, Remote

2. FytLY | React Native, TypeScript, Redux, AI / WebSockets, HealthKit Production cross-platform fitness app (shipped to App Store, discontinued May 2026) with real-time AI coaching, gamification, HealthKit / Health Connect sync, and 50+ API integrations. Led full-cycle mobile product development as co-founder.

3. Athletics (Sports Community App) | React Native, Production Community platform for sports events and real-time updates; shipped to production with active user adoption (Innow8 Apps).

4. Text-to-Image AI Showcase | React Native, DALL·E API Proof-of-concept mobile app converting text prompts into images via generative AI, exploring AI integration in mobile products.
